Bachelor of Science in Computer Science  
Minors in Mathematics, Business, and Design  
Commonwealth Honors Program  
3.94 GPA

## Knowledge and Skills

TRADITIONAL PROGRAMMING

**C, C++, Objective-C, Python, Java**

WEB TECHNOLOGIES

**HTML5 + CSS**

**Javascript (jQuery, Ember.js, Canvas)**

**Web Application Development**

OPERATING SYSTEMS

**OS X, Windows, Linux, iOS**

DESIGN

**Graphic and User Interface Design**

## Employment

2011 - PRESENT

### The MITRE Corporation Bedford, Massachusetts

#### Web and Mobile Software Developer

In my time at MITRE, my role as a developer has grown quickly. I most recently worked creating Javascript and iOS satellite-tracking applications for the United States Navy and Coast Guard. Other projects I've contributed to include a Python application in the field of language processing.

SPRING 2011

### Institution of Visualization and Perception at UMass Lowell, Lowell, Massachusetts

#### Intern / Research Assistant

I spent the Spring 2011 semester as part of a group of graduate students at UMass Lowell, writing code for the open-source visualization platform WEAVE, written on the Flex platform. (oicweave.org)

2009 - PRESENT

### Web Design by Andrew Ambrosino

#### Freelance Web Designer and Developer

Since 2009, I have provided website design and development services for business of varying sizes. My clientele has grown quickly and I now specialize in developing full websites and web applications on the Drupal CMS platform.
