## employment

**2013 Microsoft Foundry  
Cambridge, MA**

**2011-2013 The MITRE Corporation  
Bedford, MA**

I most recently worked creating HTML5 and native mobile applications for the United States Navy and Coast Guard. I've also contributed to a Python application in the field of natural language.

**2012 Institution of Visualization and Perception  
University of Massachusetts Lowell**

I spent the Spring 2012 semester as part of a group of students at UMass Lowell, writing code for the open-source visualization platform WEAVE, written on the Flex platform. (oicweave.org)

**2009 - Web Design by Andrew Ambrosino  
Freelance Web Design and Development**

Since 2009, I have provided website design and development services for business of varying sizes. My clientele has grown quickly and I now specialize in developing full websites and web applications on the Drupal CMS platform.
